Summary

Highly skilled Senior Frontend Developer with over 12 years of experience in web development, specializing in modern JavaScript frameworks like React and Vue.js. Proven ability to deliver high-quality, reusable UI components, resolve complex issues, and optimize performance. Passionate about learning emerging technologies and delivering user-centric solutions.

My core strengths include a passion for exploring emerging technologies, a strong dedication to delivering high-quality solutions, and a tenacious problem-solving mindset. I am committed to going the extra mile to ensure project success, often extending my efforts beyond regular work hours to resolve critical challenges.

Skills and Technologies

Frontend Development

- **Languages:** HTML, CSS, JavaScript (ES6+), TypeScript
- **Frameworks & Libraries:** React, Redux, React Query, Vue.js, AngularJS
- **Styling:** Tailwind CSS, Sass, Less, BEM
- **Testing:** Cypress, Jest, Enzyme, React Testing Library
- **Tools:** npm, Git, Gulp, Webpack

Backend Development

- **Languages & Frameworks:** PHP, Laravel, CodeIgniter, Kohana, Express, Next.js
- **Database:** MySQL, MongoDB
- **API Technologies:** REST, GraphQL

Other Skills

- Mobile-first and responsive design
- WordPress and PrestaShop development
- jQuery, Bootstrap, Bulma

- Jira for project management

Experience

Svitla Systems, Inc. October 2022 – current time
Full Stack Engineer / Frontend developer
- Collaborated on backend development using Node.js, building RESTful APIs and improving server-side performance and reliability.
- Developed and maintained projects using Next.js integrated with headless CMS and GraphQL, ensuring scalable architecture and efficient data management.
- Worked on implementation of new, reusable, and efficient UI components, significantly improving user experience and interface consistency.
- Played a pivotal role in diagnosing and resolving complex bugs, ensuring high software quality and reliability.
- Worked on implementation of website translation features, incorporating advanced caching mechanisms to optimize site performance and user accessibility.

Hero Teams September 2018 – October 2022
Full Stack Engineer / Frontend developer
- Using React for creating frontend applications
- Applied responsive design principles to ensure an optimal user experience across various devices, facilitating easy access to car listings and transactions.
- Developed single-page applications using React and Redux to enhance user experience.
- Build websites using Vue.js.
- Refactored legacy jQuery code by implementing modern Vue.js functionality, improving code maintainability, performance, and aligning with contemporary development standards.
- Writing autotests by using the Cypress framework.

Loud & Clear December 2013 – September 2018
Full-stack Developer
- Creating wordpress themes/plugins.
- Creating backend api by using Laravel framework.
- Developed a dynamic reporting feature leveraging Laravel for robust backend processing and Highcharts for visually engaging, interactive data visualizations, enabling users to generate customizable and insightful reports.
- Creating Frontend by Angular 1.7 and React

PixelTeh February 2013 – December 2013
Full-stack Developer
- Creating wordpress themes/plugins.
- Creating sites from scratch by using Codeigniter.
- Creating FE part with Angular 1.3.
- Developed an interactive restaurant menu application using AngularJS for dynamic, user-friendly interfaces and CodeIgniter for efficient backend processing, streamlining menu management and enhancing the user experience.

BestWebSoft June 2011 – February 2013

Wordpress developer

- Specialized in developing custom WordPress themes and plugins, ensuring responsive design for optimal user experience across devices and achieving pixel-perfect precision to meet exact design specifications.
- Worked on integrating payment systems, enabling seamless and secure transaction processing.

Education

Zaporizhzhya National Technical University
2007-20012
Master's degree in Information Technology Design

Latest Project

Frontend Application for Leave Management

- Technologies: React, Vue.js, Tailwind, React Query
- Responsibilities:
  - Designed the project structure and implemented routing.
  - Developed new pages and reusable components, ensuring efficient and maintainable code.
  - Optimized performance and user experience across the application.
